

**From Camera To Print**  
***The Craft of Fine Art Printing***  
With Michael Reichmann & Jeff Schewe

A Luminous Landscape Download Video Tutorial

***Table of Contents***

***From Camera to Print: 1 - Introduction***

Introduction & Disclosure  
History of Inkjet Printing  
A 'secret'...

***From Camera to Print: 2 - Printer Models***

***Current Printer Review***

**Epson:**

Epson 3800  
Epson 7800

**Canon:**

Canon IPF 5000

**Printer Heads**

**Ink cartridges & cost**

**Hewlett Packard:**

HP B9180  
HP Z3100

**Manufacturer competition**

***From Camera to Print: 3 - Compare Images, Paper Choice***

Image Comparison of HP Z3100 & Canon iPF5000

Paper Choices

Addendum

***From Camera to Print: 4 - Optimize, Monitor Calibration***

Optimize Image at Exposure

Shoot Raw

Use the Histogram

Expose to the Right

Calibrating your monitor

When things look odd

ColorEyes display pro

## ***From Camera To Print: 5 - Scanning Film***

- Scanning
- Epson Scan
- VueScan
- Scanning with Silverfast
- Profile your Scanner
  - histogram adjustment
  - curves adjustment
- Scan RAW

## ***From Camera To Print: 6 - JPEG, Bit Depth & Colour Space***

- JPEG compression
- 8 bit or 16 bit?
- Colour Spaces
- ColorThink
- The Bottom Line

## ***From Camera To Print: 7 - Optimal RAW Processing***

- Optimal RAW Processing
  - crop
  - white balance
  - exposure
  - colour saturation
  - mid-tone contrast enhancement
- Summary
- Photoshop for Local Adjustment
  - Sharpening
  - Soft Proofing
- Other Raw Processors

## ***From Camera To Print: 8 - Noise Reduction***

- Noise reduction (LightRoom)
- Another RAW advantage
- Noise reduction (Camera Raw)
- Noise Ninja
- Noiseware
- Fine tuning the adjustment
- Colour noise reduction at RAW
- Evaluating noise reduction

## ***From Camera To Print: 9 - Profiling***

**Profiling**

**Camera Profiling**

**3 choices**

**not in LightRoom or Camera Raw**

**use AcrCalibrator script**

**3rd party services**

**Color Eyes**

**Who should create camera profiles**

**AcrCalibrator cont'd**

**Printer Profiling!**

**Sources for Printer Profiles**

**Making a Printer Profile**

**with Eye-One Match**

**Printing a Printer Profile Target**

**Measuring the Target**

**Profile Saving & Naming**

**Profiling Summary**

## ***From Camera To Print: 10 - Input Sharpening***

**Input Sharpening**

**in LightRoom**

**Sharpening different image types**

**Amount**

**Radius**

**Detail**

**Edge Masking**

**Demos**

**Defaults for non-RAW**

**Evaluating input sharpening**

## ***From Camera To Print: 11 - PhotoKit Sharpener***

**Sharpening with PhotoKit Sharpener**

**Local Contrast Enhancement**

**Input sharpening**

**Flatten & Save As**

**Size for Output Sharpening**

**Output Sharpening**

**Flatten & Save As**

**or...**

**Print**

## ***From Camera To Print: 12 - Resolution***

- Resolution
- Use native resolution
- Up-rezzing
  - with PhotoKit Super Sharpener
- Using Super Sharpener
  - for Local Sharpening Effects
- Visible Resolution
- Print Viewing distance
- Resolution's 'sweet spots'
- Printers' Native Resolutions
- Uprez in CameraRaw or Photoshop?
- Uprez Summary
- More supporting evidence
- Test it on your printer

## ***From Camera To Print: 13 - Photoshop Colour Settings***

- Photoshop Color Settings
  - More Options
  - Working spaces
  - Color Management
  - Conversion Options
  - Advanced Controls
- Save Preset!
- Save Preset & Units as Action

## ***From Camera To Print: 14 - Soft Proofing***

- Soft Proofing
  - choose Profile
  - Display Options
  - Render Intent
- Save Proof Condition Setup
- What do you do?
- Curves Correction
- Saturation Bump
- Punch Black
- Adjustment details
- The Bottom Line
- Compare Screen to Print
- Gamut Warning?
- Set Proof Default
- Conclusion

## ***From Camera To Print: 15 - Printing from Windows***

- Printing from Windows
- Printing from CS3
- Print... Select Printer
  - Color Handling
